JyotishDesk - Video Presentation Script

```
<div class="box">
<b>Note:</b> Ye script aapki video presentation ke liye 4-5 minute ke hisaab se banayi gayi hai. Aap isko
screen record karte huye padh sakte hain ya apne hisaab se natural flow mein bol sakte hain.
</div>
```

1. Introduction & Problem Statement (0:00 - 1:00)

Aap:

"Hello everyone, aaj main aapko apne project **JyotishDesk** ka demonstration dene jaa raha hu.

Problem Statement:

Dekhiye, aajkal astrologers ke paas din mein bohot saare clients aate hain. Har client ki birth details (DOB, Time, Place) aur consultation notes ko notebooks ya WhatsApp par manage karna bohot mushkil ho jata hai. Kai baar purane clients ka data kho jata hai aur follow-ups miss ho jate hain.

Solution:

Isi problem ko solve karne ke liye maine **JyotishDesk** banaya hai. Ye ek professional B2B CRM (Customer Relationship Management) software hai jo astrologers ke daily tasks ko AI aur automation ke through ekdum aasan bana deta hai."

2. Tech Stack & Login Security (1:00 - 1:45)

Aap:

(Screen par Login Page dikhate huye)

"Ye humara Frontend hai jo maine **React.js** aur **Tailwind CSS** mein banaya hai. Backend mein humne **Node.js**, **Express** aur **SQLite** database ka use kiya hai.

Sabse pehle aata hai humara Login aur Signup system. Security ke liye yahan par maine **JWT (JSON Web Tokens)** ka use kiya hai. Humara backend password ko encrypt karke database mein save karta hai, aur jab astrologer login karta hai, toh ek secure JWT token generate hota hai. Isse koi bhi unauthorized person bina login kiye dashboard access nahi kar sakta."

3. Dashboard & Dynamic Theming (1:45 - 2:30)

Aap:

(Login karke Dashboard dikhate huye)

"Login karne ke baad hum aate hain Dashboard par. Ye astrologer ka main control center hai. Yahan unko ek overview milta hai ki unke total kitne clients hain aur aaj unko kisko follow-up message karna hai.

Ek aur khaas UI feature jo maine add kiya hai, wo hai **Dynamic Light aur Dark Mode**. Niche sidebar mein  aur  ka toggle button hai. Ye LocalStorage use karta hai, jisse astrologer apne mood aur preference ke hisaab se poore software ki theme ek click mein change kar sakta hai."

4. Clients & Consultations with AI Integration (2:30 - 3:30)

Aap:

(Clients aur Consultations tab open karte huye)

"Ab aate hain is software ke core feature par. 'Clients' tab mein astrologer apne naye clients add kar sakta hai.

Lekin iska sabse bada magic 'Consultations' tab mein hai. Jab bhi astrologer kisi client se baat karke apne rough notes likhta hai, toh main backend mein **Google Gemini AI API** ka use kar raha hu.

Jaise hi hum 'Generate AI Summary' par click karte hain, mera system un rough notes ko AI ke paas bhejta hai, aur AI unhe ek proper, professional paragraph mein convert kar deta hai aur client ke liye specific astrological remedies (upay) bhi suggest kar deta hai. Isse astrologer ka ghanto ka kaam seconds mein ho jata hai."

5. Automation: PDF Generation & Emails (3:30 - 4:15)

Aap:

(Email bhejte huye aur PDF download karke dikhate huye)

"Client ko consultation ke baad manual message type karne ki zaroorat nahi hai.

Yahan maine do badiya features lagaye hain:

1. **PDF Generation:** 'Download PDF' par click karte hi jspdf aur html2canvas library frontend mein turant ek sundar branded PDF report generate kar deti hain jo astrologer client ko WhatsApp par bhej sakta hai.
2. **Automated Emails:** 'Send Summary Email' par click karte hi, humara backend **Nodemailer** aur SMTP server ka use karke client ki email ID par officially ek premium email shoot kar deta hai jisme saari summary aur remedies hoti hain."

6. Conclusion (4:15 - 5:00)

Aap:

"End mein, humare paas 'Follow-ups' ka system hai jo astrologer ko yaad dilata hai ki kab kis client ko review ke liye bulana hai.

Toh overall, **JyotishDesk** ek complete, secure, aur AI-powered ecosystem hai jo ek modern astrologer ki saari zaruraton ko dhyaan mein rakh kar design kiya gaya hai.

Thank you for watching!"
